

WORKSHOP

CAPITALISM AND AUTHORITARIANISM: PERCEPTIONS FROM EUROPE AND LATIN AMERICA – PART 1

** In memory of Boike Rehbein **

The idea of the event is to bring together European and Latin American researchers to discuss the global phenomenon of authoritarianism today, seeking its roots in the profound material, moral and symbolic transformations of capitalism in recent decades. In this way, the comparison between empirical experiences from different countries and continents, as well as the theoretical articulation based on them, can offer a broad interpretative framework for this problem of such urgency in today's world.
